"The 'Delivering Restorative Practices' series - really 'do the job' they were designed to achieve. The children really enjoyed the workbook and story and our staff enjoyed delivering them, using the clear guidance to help them develop their lesson plan. The books compliment the SEAL (*Social and Emotional Aspects of Learning*) programme very well and are a welcome addition to our work in this area. Our Emotional Wellbeing Worker has also been able to use these materials and the concepts they introduce to good effect."

"We were already a fair way down the road of implementing restorative practices across our whole school and have found these books and Mary's story to be very valuable, particularly in engaging our hard to reach children. I am confident that those just starting out on the implementation of restorative practices will benefit greatly from their use."

"The 'Delivering Restorative Practices' series of workbooks and guidance booklets offer students, staff, parents and Governors a set of prompts in an imaginative and fun way that delivers the core principles of Restorative Practices whilst allowing development of understanding of its uses. The materials underpin the practical work being done in informal settings in the home and school. They can be used for a variety of ages and groupings."

"They sit very comfortably with the SEAL and SEB's work being undertaken in many of our schools."

"For practitioners who are starting out on restorative practices or those wanting to refresh their practice the materials are very useful."

**C. Straker, Head Teacher, Endeavour High School, Hull, UK**
